- Lifting loose gears

## **SAG has services for the technical inspection of Equipment and Machinery as follows:**

- To technically inspect and approve all Lifting equipment and construction machineries manufactured in or imported.
- To cooperate with regulatory bodies and work the internal and external accredited testing centers and the organization of industrial research.
- To provide guidance for clients about importing and exporting Lifting equipment and Construction machineries, either manufactured or imported.

# INSPECTION SNAPS

# NON DESTRUCTIVE TESTING

Non-destructive testing (NDT) comprises a vast array of analytical techniques that are applicable to a wide range of industries. These techniques can identify and assess defects and examine the properties of all kinds of materials and structures without causing any damage. As NDT in no way alters the part or structure under inspection, it is an extremely useful technique that can lead to cost and time savings when applied to product evaluations, asset management and fault identification and repair.

Our NDT services comprises of:

## Conventional NDT Services

- Visual inspection
- Ultrasonic Thickness Testing
- Magnetic Particle Testing
- Dye Penetrant Testing
- Coating Inspection

# PORTFOLIO
